

Word Knowledge Rating Scale

A word knowledge rating scale allows students to declare their familiarity with vocabulary before, during and after instruction. Words are added to the list from curriculum or resources within a unit of study.

| Word | I know nothing about this word. | I can spell this word correctly. | I have seen/heard it before. | I can define it as it relates to this course. |
|------|---------------------------------|----------------------------------|------------------------------|---|
| | | | | |
| | | | | |
| | | | | |
| | | | | |
| | | | | |
| | | | | |
| | | | | |

EXAMPLE: Waves

| Word | I know nothing about this word. | I can spell this word correctly. | I have seen/heard it before. | I can define it as it relates to this course. |
|---------------------------|---------------------------------|----------------------------------|------------------------------|---|
| amplitude | | | | |
| angle of incidence | | | | |
| angle of reflection | | | | |
| antinodes (loops) | | | | |
| barrier | | | | |
| boundary | | | | |
| compression | | | | |
| constructive interference | | | | |
| crest | | | | |
